

ANGELS ON EARTH

A variety of angels are here to bring us healing, happiness and love

GUARDIAN ANGELS

Angels have twice saved Bernard Rosa's life. In 1973 he had a motorbike crash. Convinced he would die, he recalls a 'force' dragging him from the path of the car that would have killed him. Grateful for his narrow escape, he vowed to pay homage to the angels he says saved him.

He became a pioneer of fantasy photography, and has published cards and books of images of angels with uplifting quotes of wisdom, which he hopes will inspire others as he's been inspired.

He digitally alters photos he's taken all over the world to create his fantasy images.

'Angels are spiritual beings with healing and interventional powers, who take on a physical winged form like my images, emanating a pure white light,' Bernard says. 'People strive to become angelic through selfless acts of kindness.'

Last year Bernard had more angelic assistance when he suffered a heart attack. Again he almost died, but he says his guardian angels kept him alive.

His new book *Bible Gifts* (Gary Allen Pty Ltd, \$21.95) features his beautiful images with inspiring quotes from the Bible, researched by Piers Fisher-Pollard.

Bernard's health scare made him realise that the message in his books – to enjoy life, to love fully, to manifest your own future and to believe in yourself – is more important than creating the work itself.

'You can communicate with your angels through focus, prayer and meditation. Trust them, surrender your problems to their care, then follow your heart.'

ANGELS IN LOVE

Angels can also be called on to find true love or reignite the spark in a relationship. And renowned angel channel and author Doreen Virtue says they love to do this.

'The romance angels are like Cupid, helping us experience the joy and healing power of a wonderful love relationship.'

'They help us experience greater joy. They know people in a happy relationship have better health and enjoy life more.'

So how do you contact them?

'Mentally ask the romance angels for help. One of the best ways to do this is to write a letter to them, and just pour out your heart. Say: "I am ready for great love, please help me find my soulmate. Please give me clear guidance I can easily understand as to how I can prepare or meet this person." Then pay close attention to the impressions that come in.'

She's made *The Romance Angels – How to Work with the Angels to Manifest Great Love* (Hay House, \$14.95), to help.

And she has taken her own advice, with amazing results. After two difficult marriages and time alone, Doreen finally asked them for help in finding her soulmate. And they obliged – although even she ignored their guidance for a while.

'I was told to go to yoga, over and over – but I didn't want to. I resisted. But I finally did, and that's where I met my childhood sweetheart again. He was my first love and now he's my last.'

Doreen and her husband, author and shaman Steven Farmer, are so happy and so respectful and caring of each other that it certainly makes you believe in the wisdom of the angels!

ANGELS OF THE SEA

Another group of angels are the angels of the sea – the whales and dolphins. Clairvoyant and spiritual teacher Artemis says they are easy to get in touch with and can teach us a lot.

'Celestial angels have been known to save lives, their wings have been felt by those who are grieving, and they have appeared in dreams to foretell events and save people,' she says.

'The angels of the sea are another type of angel. There are many people who owe their survival at sea to their help. And look how many go on whale watching tours now or swim with dolphins for physical and emotional healing. Being in the presence of these beautiful creatures brings joy to our hearts and helps fill that empty gap inside us that calls for a deeper meaning to life,' Artemis explains.

'They help us remember the softness and the beauty of our heart, and our deep desire to connect with all beings on earth.'

One way to access their wisdom is by swimming with them, a truly awe inspiring experience. Another way is meditation. Artemis' CD *Discover Your Angels of the Sea* (\$29.95, to order call 1800 880 022) is a simple way to communicate with them.

'In a guided meditation a person's voice guides you through a creative visualisation. It allows you to access the intuitive part of your mind and to receive answers from these angels.'

'Using my CD you will meet a dolphin archangel, who can help you heal a present or past issue or emotional blockage, and commune with a whale, entering a deep state of bliss.'
